

MGT-409 COMMUNITY HEALTHCARE PLANNING AND RESPONSE TO DISASTERS

NO. OF OPENINGS: 35

ERIE COUNTY

2 DAYS

JULY 23 - 24, 2014

ANNOUNCED: MARCH 11, 2014

Description:

The National Center for Biomedical Research and Training (NCBRT) will be offering this course. When an entire community is affected by a large-scale incident involving mass casualties such as a natural disaster, a pandemic outbreak, or a terrorist attack, response activities require integration of emergency management, healthcare providers, public health officials, public safety officials, and other agencies operating in a community. Large-scale incidents are likely to overwhelm healthcare systems and communities must work together to address the needs of an overwhelming number of patients.

Course objectives:

This course will provide medium-to high-level decision makers with comprehensive planning tools to mitigate impacts on communities during large-scale incidents. This course examines the need for collaboration among responders in a community-side disaster response.

Prerequisites:

You must be a US Citizen to take this course.

Who Should Attend?

- Hospital safety, emergency planning, and emergency preparedness
- Nursing homes and long-term care providers
- Public health
- Emergency management
- Emergency medical services
- Fire service
- Law enforcement
